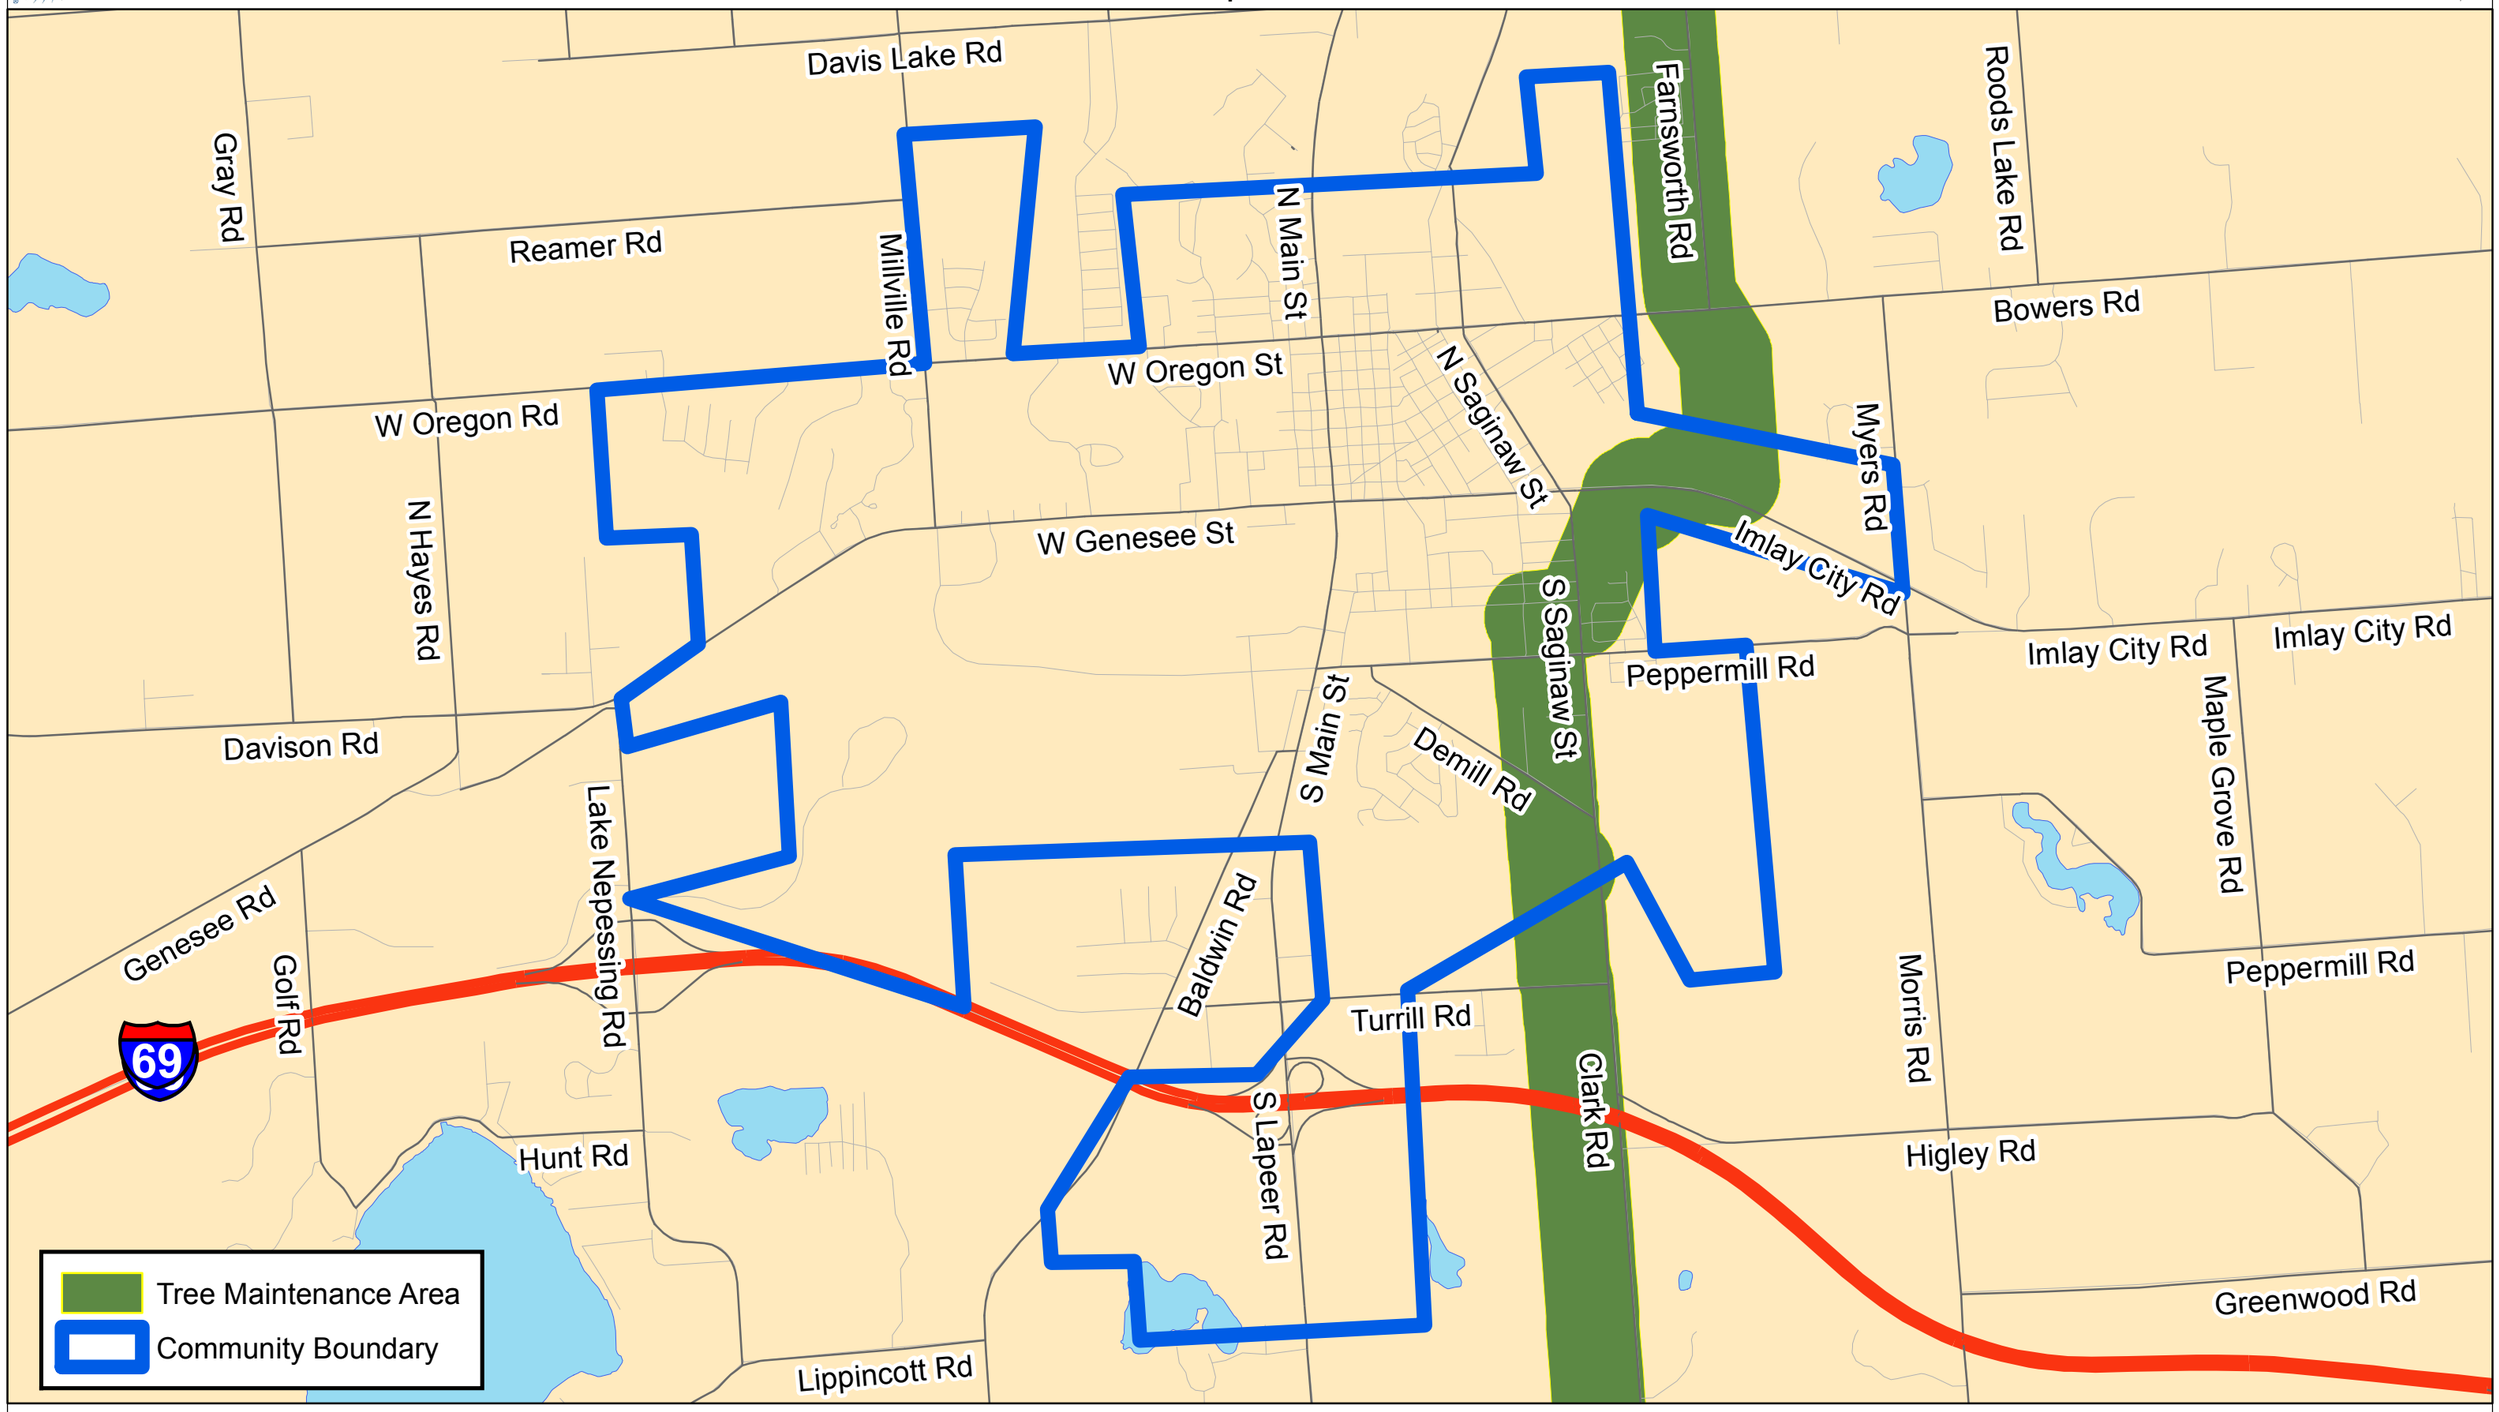
DTE Energy

2018 Tree Trim Maintenance Program

Lapeer



- Two-thirds of the time DTE Energy customers spend without power is due to trees.
- Tree trimming is an industry-wide solution to prevent outages. DTE Energy follows industry best practice and standards for tree trimming.
- DTE Energy works collaboratively with customers every step of the way to address their concerns before we begin work.

Please note: During 2018, DTE is planning to trim trees within the area shaded green. Additional tree work may be necessary based on circuit performance to improve reliability. Severe weather, or other circumstances may change the timing and extent of the work performed.
