

CLEARING HYDRANTS MESSAGE:

CLEARED HYDRANT

UNCLEARED HYDRANT

Help us, help you. In a fire, every second counts. Valuable time will be wasted if we have to search for and/or dig out fire hydrants buried under the snow. The Department of Public Works will dig out hydrants as time and demands allow, however it will take several days to get to all of them. You can help us by cleaning the snow away from the hydrant(s) near your home. This simple act will help ensure that if a fire was to happen to you or your neighbours, the Fire Department will be able to quickly and safely access the nearest hydrant.

Thank you,

TERRY KLUGE
Fire Chief
